

The goal of Digital Literacy is to teach and assess basic computer concepts and skills so that people can use computer technology in everyday life to develop new social and economic opportunities for themselves, their families, and their communities.

Whether you are entirely new to computing or have some experience, this curriculum will help you develop a fundamental understanding of computers. From using the Internet, to sending e-mail, to creating a résumé, the Digital Literacy Curriculum helps you develop the essential skills you need to begin computing with confidence.
