COMPUTER TECHNICIAN STUDENTS VISIT DART

PRESS RELEASE – FOR IMMEDIATE RELEASE

December 17, 2014

UCCI Computer Technician Certificate students, under the supervision of lecturer, Mr. Selgin Amador, had a wonderful experience during their recent visit at Dart Enterprises.

Mr. Amador shared that the group were able to obtain some valuable career advice from the President, the Vice President of Human Resources, the Learning & Development Manager, managers from the IT Department as well as two UCCI IT students currently working with the company.

“The students were very grateful and thanked everyone at Dart for their graciousness and hospitality,” said Mr. Amador.

The Computer Technician Certificate is a programme designed to conform to Industry Standard Certification such as CompTIA (A + Certification) and Microsoft (MCTS and MCITP Certifications).

It is intended to prepare students to take up entry-level front-line positions as hardware, software and desktop support technicians in any IT-based business environment. Students also acquire the foundation for further professional advancement in Computer Science.
